

FELICE Wheel Balancer Series

Good Design • Good Quality • Good Price

AI320 B • AI400 B • AI600 BP Precision Balancing Solutions for Modern Workshops

Reliable, accurate, and easy-to-use wheel balancers designed for professional tire service centers and automotive workshops.

As an OEM manufacturer, we provide professional OEM manufacturing solutions for customers worldwide.

customized branding solutions for distributors and workshop equipment suppliers.

AI320 B

Integrated Digital Display System

Compact & Practical Solution

The AI320 B is designed for small and medium-sized workshops requiring reliable balancing performance with simple operation.

Key Features

- Integrated digital display
- Built-in control keyboard
- Easy-to-use interface
- Fast operation and setup
- Practical and space-saving design

Ideal For

- Tire shops
- Small garages
- Daily workshop use

WHY CHOOSE OUR WHEEL BALANCERS?

- ✓ Accurate and stable balancing performance
- ✓ Easy operation and maintenance
- ✓ Durable construction for long-term use
- ✓ Suitable for various wheel types
- ✓ Designed for professional and high-volume workshops

Customers can customize:

- ◆ Machine color
- ◆ Printed logo and brand name
- ◆ Startup screen logo display
- ◆ Product labeling and packaging

Optional Pneumatic Wheel Locking System

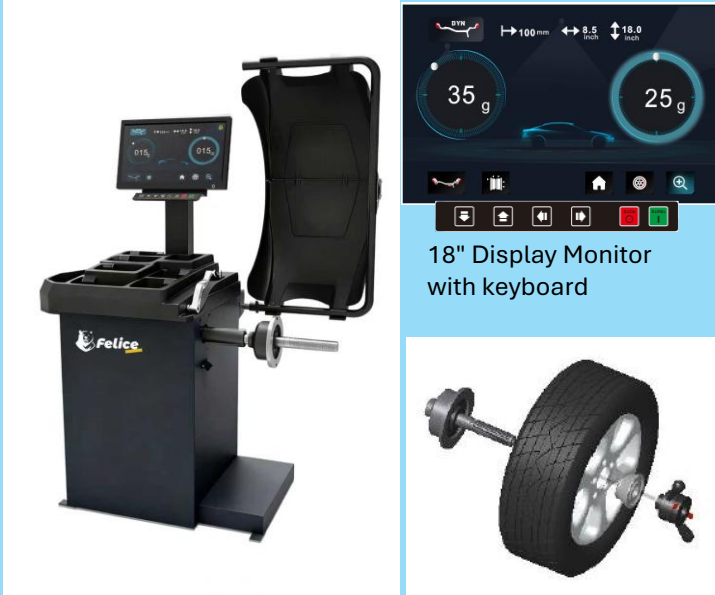

An optional pneumatic wheel locking mechanism is available to improve operating comfort and workshop efficiency.

With a simple press operation, the wheel can be automatically locked into position without manual tightening.

Standard Accessories

AI400 B
