

MECHANICAL TWO-POST LIFT

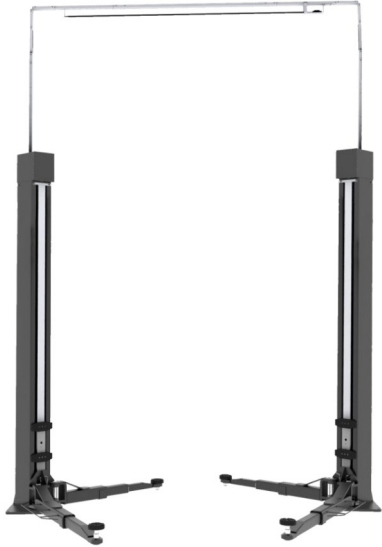

Felice LX-7440E

Lifting capacity

**4000
kg**

✓ Smooth Operation

The lift is driven by a double-motor screw and nut mechanism, ensuring smooth and safe operation. The nut remains in a self-locking state. Simple operation, ideal for the maintenance of new energy vehicles (NEVs).

- The columns feature an asymmetric design, providing a sturdy and stable structure.
- ← • Flexible connections between columns, with adjustable spacing to meet specific requirements.

-
- Reliable and durable screw and nut mechanism.
 - With an alarm for nut damage.

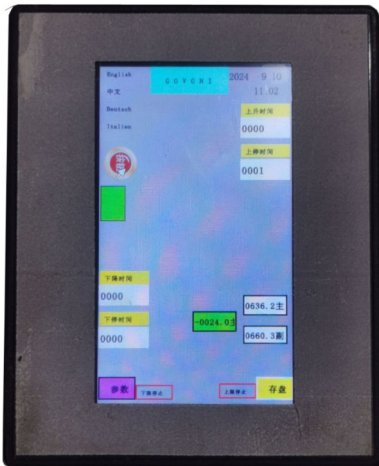

- Built-in motor, offering a more compact structure.
- ← • With low operating noise (less than 65 dB).

FELICE: GOOD DESIGN • GOOD QUALITY • GOOD PRICE

Flexible installation options: broader height and width range, and can be installed without a crossbeam

- Asymmetric lifting arm design allows for wide door openings. Custom lifting arms are available in various types.

- PLC control system provides a more intuitive display, with an encoder synchronization system for enhanced data accuracy.
- Color display screen, supporting four languages (English/Chinese/German/Italian).
- Equipped with CE-stop anti-crush foot function.

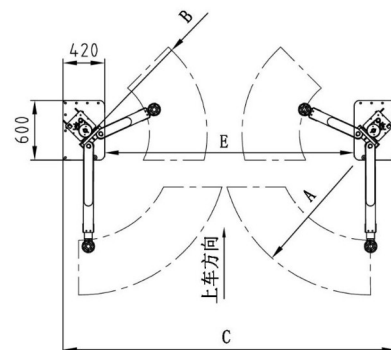

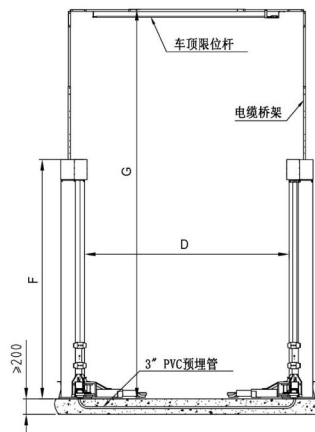

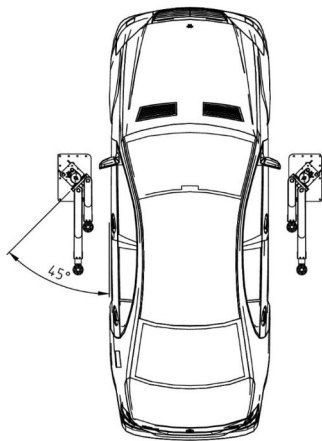

- 5000kg lifting capacity model currently in development.

- ✓ Optional multi-height adapters
- ✓ Custom lifting arms are available in various types

TECHNICAL DATA

Model	LX-7440E
Lifting capacity	4000kg
Lifting / lowering time approx.	46/46sec
Lifting height	1990mm
Adjustment range, support disc	110-190mm
Extension range, long support arms (A)	950-1500mm
Extension range, short support arms (B)	590-1170mm
Overall width (C)	3300-3400mm
Inside columns (D)	2637-2737mm
Drive-through width (E)	2460-2560mm
Column height (F)	3100mm
Installation height (G)	3200-4200mm
Motor power	1.5kW x 2
Power supply	3~/N+PE 220~380V 50~60Hz
